*This ink color is*  
**GOLD**  
 Available in: Thermography,  
 Letterpress, Digital

*This ink color is*  
**BLACK**  
 Available in: Thermography,  
 Letterpress, Digital

Our products are made by hand. Ink colors may vary in appearance. Here is a list to remember when selecting an ink color for your order:

1. Inks are semi-transparent. They will appear differently when printed on papers other than those shown. Dark papers (such as blues, greens, reds, and blacks) may make the ink look muddy or grey. We suggest using metallic gold or silver on dark papers, as these maintain their true color.
2. Heavy coverage, a thick line or bold typestyle, will make an ink color appear darker than a thin line or fine script of the same color.
3. Our inks are designed to coordinate across our printing processes. Each print process may vary based on the ink and materials that you select.
4. There may be subtle differences in the same ink color from dye lot to dye lot.
